Yamafuji, Keiko, see Toko, K. (41) 143

SUBJECT INDEX TO VOLUME 41 (1991)

Adsorption
Proteins; Thermodynamics; Ion co-adsorption; Ion exchange; Silver iodide; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Alkali cation transport kinetic
Cryptand-mediated transport; Temperature-jump method; Ionizable mobile carrier; Lipid membrane (Castaing, M. (41) 203)

9-Aminoacridine
Intercalation; DNA; ^{23}Na; ^{7}Li, NMR spin–lattice relaxation (Hald, M. (41) 113)

Anesthetic–membrane interaction
Bacteriorhodopsin; Purple membrane; Flash photolysis; Proton pump; *Halobacterium halobium* (Uruga, T. (41) 157)

Anisotropy
Subtilisin; Fluorescence; Lifetime; Photon-counting (Janot, J.M. (41) 277)

Bacteriorhodopsin
Purple membrane; Anesthetic–membrane interaction; Flash photolysis; Proton pump; *Halobacterium halobium* (Uruga, T. (41) 157)

Biological engines
Chemomechanical coupling; Muscle dynamics (Oplatka, A. (41) 237)

Bovine serum albumin
Ligand-binding kinetics; Tri- and tetra-anionic ligands; Isomerization modes; Electrostatic interaction (Murakami, K. (41) 253)

Proteins; Thermodynamics; Adsorption; Ion co-adsorption; Ion exchange; Silver iodide (Fraaije, J.G.E.M. (41) 263)

Brownian motion
Non-linear Markovian system; Langevin equation; Gaussian white noise (Mazur, P. (41) 41)

Ca^{2+} binding
Lipid membrane; Phase transition; Oscillation; Excitability; Neuro-computer (Toko, K. (41) 143)

Carrageenans
Molecular weight determination; Low-angle laser light scattering; Gel permeation; Sedimentation–diffusion analysis; Osmometry (Slootmaekers, D. (41) 51)

Cellular automata
Protein adsorption; Two-dimensional aggregation; Computer simulation; Ferritin (Stenberg, M. (41) 131)

Charge formation
Polyelectrolytes; Electro-osmotic effects; Microporous membranes; Poisson–Boltzmann equation (Hijnen, H.J.M. (41) 101)

Charge structure function
Polyelectrolytes; Electrolytes; Dielectric structure function (Jannink, G. (41) 15)

Chemomechanical coupling
Biological engines; Muscle dynamics (Oplatka, A. (41) 237)

Circular dichroism
Equine lysozyme; Thermal denaturation; Fluorescence (Morozova, L. (41) 185)

Computer simulation
Protein adsorption; Two-dimensional aggregation; Cellular automata; Ferritin (Stenberg, M. (41) 131)

Conformational change
Lipid head group; Liposome; Zeta potential; Phase transition (Makino, K. (41) 175)

Counterion condensation theory
Linear polyelectrolytes; Mixed valency counterion systems; Ion activity coefficients (Paoletti, S. (41) 73)

Crosslink density
Polyelectrolyte; Ion mobility; NMR dispersion (Tromp, R.H. (41) 81)

Cryptand-mediated transport
Temperature-jump method; Ionizable mobile carrier; Alkali cation transport kinetic; Lipid membrane (Castaing, M. (41) 203)

Dielectric structure function
Charge structure function; Polyelectrolytes; Electrolytes (Jannink, G. (41) 15)

DNA
Intercalation; 9-Aminoacridine; ^{23}Na; ^{7}Li, NMR spin–lattice relaxation (Hald, M. (41) 113)

Electrolytes
Charge structure function; Polyelectrolytes; Dielectric structure function (Jannink, G. (41) 15)

Electron transport inhibitor
N,N-dimethylformamide; Energy transfer inhibitor; Mg^{2+}-ATPase inhibition; Photosystem II inhibition (Peña-Valdivia, C.B. (41) 169)

Electro-osmotic effects
Polyelectrolytes; Charge formation; Microporous membranes; Poisson–Boltzmann equation (Hijnen, H.J.M. (41) 101)

Electrostatic interaction
Bovine serum albumin; Ligand-binding kinetics; Tri- and tetra-anionic ligands; Isomerization modes (Murakami, K. (41) 253)

Electroviscosity
Polyelectrolytes; Free volume model, Navier–Stokes–Onsager equation; Poisson equation (Imai, N. (41) 31)

Energy transfer inhibitor
N,N-dimethylformamide; Electron transport inhibitor; Mg^{2+}-ATPase inhibition; Photosystem II inhibition (Peña-Valdivia, C.B. (41) 169)

Equine lysozyme
Thermal denaturation; Circular dichroism; Fluorescence (Morozova, L. (41) 185)

Ethidium dye
Supercoiled DNAs; Linear DNAs; Torsion constants (Wu, P.G. (41) 217)

Excitability
Lipid membrane; Phase transition; Oscillation; Ca^{2+} binding; Neuro-computer (Toko, K. (41) 143)

Ferritin
Protein adsorption; Two-dimensional aggregation; Computer simulation; Cellular automata (Stenberg, M. (41) 131)

Flash photolysis
Bacteriorhodopsin; Purple membrane; Anesthetic–membrane interaction; Proton pump; *Halobacterium halobium* (Uruga, T. (41) 157)

Fluorescence
Equine lysozyme; Thermal denaturation; Circular dichroism (Morozova, L. (41) 185)

Subtilisin; Anisotropy; Lifetime; Photon-counting (Janot, J.M. (41) 277)

Free volume model, Navier–Stokes–Onsager equation
Polyelectrolytes; Electroviscosity; Poisson equation (Imai, N. (41) 31)

Gaussian white noise
Brownian motion; Non-linear Markovian system; Langevin equation (Mazur, P. (41) 41)

Gel permeation
Carrageenans; Molecular weight determination; Low-angle laser light scattering; Sedimentation–diffusion analysis; Osmometry (Slootmaekers, D. (41) 51)

Glycocalyx
Polyelectrolyte brushes; Mechanical balance; Interendothelial cleft (Silberberg, A. (41) 9)

Halato-telechelic ionomers
Polyelectrolytes; Viscosity; Light and neutron scattering; Sulfonated polystyrene (Weill, G. (41) 1)

Halobacterium halobium
Bacteriorhodopsin; Purple membrane; Anesthetic–membrane interaction; Flash photolysis; Proton pump (Uruga, T. (41) 157)

α-Helix
M13 coat protein; Molecular dynamics simulations; Protein aggregation; β-Sheet (Sanders, J.C. (41) 193)

Hydrogen exchange
Inhibitor binding; Viscosity coupling; Subtilisin BPN′ (Ng, K. (41) 289)

Inhibitor binding
Hydrogen exchange; Viscosity coupling; Subtilisin BPN′ (Ng, K. (41) 289)

Intercalation
9-Aminoacridine; DNA; ^{23}Na; ^{7}Li, NMR spin–lattice relaxation (Hald, M. (41) 113)

Interendothelial cleft
Polyelectrolyte brushes; Mechanical balance; Glycocalyx (Silberberg, A. (41) 9)

Ion activity coefficients
Counterion condensation theory; Linear polyelectrolytes; Mixed valency counterion systems (Paoletti, S. (41) 73)

Ion co-adsorption
Proteins; Thermodynamics; Adsorption; Ion exchange; Silver iodide; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Ion exchange
Proteins; Thermodynamics; Adsorption; Ion co-adsorption; Silver iodide; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Ionizable mobile carrier
Cryptand-mediated transport; Temperature-jump method; Alkali cation transport kinetic; Lipid membrane (Castaing, M. (41) 203)

Ion mobility
Polyelectrolyte; Crosslink density; NMR dispersion (Tromp, R.H. (41) 81)

Isomerization modes
Bovine serum albumin; Ligand-binding kinetics; Tri- and tetra-anionic ligands; Electrostatic interaction (Murakami, K. (41) 253)

Langevin equation
Brownian motion; Non-linear Markovian system; Gaussian white noise (Mazur, P. (41) 41)

Lifetime
Subtilisin; Fluorescence; Anisotropy; Photon-counting (Janot, J.M. (41) 277)

Ligand-binding kinetics
Bovine serum albumin; Tri- and tetra-anionic ligands; Isomerization modes; Electrostatic interaction (Murakami, K. (41) 253)

Light and neutron scattering
Polyelectrolytes; Viscosity; Halato-telechelic ionomers; Sulfonated polystyrene (Weill, G. (41) 1)

Linear charged micelles
Micellar growth; Polyelectrolytes (Odijk, T. (41) 23)

Linear DNAs
Supercoiled DNAs; Torsion constants; Ethidium dye (Wu, P.G. (41) 217)

Linear polyelectrolytes
Counterion condensation theory; Mixed valency counterion systems; Ion activity coefficients (Paoletti, S. (41) 73)

^{7}Li, NMR spin–lattice relaxation
Intercalation; 9-Aminoacridine; DNA; ^{23}Na (Hald, M. (41) 113)

Lipid head group
Conformational change; Liposome; Zeta potential; Phase transition (Makino, K. (41) 175)

Lipid membrane
Phase transition; Oscillation; Excitability; Ca^{2+} binding; Neuro-computer (Toko, K. (41) 143)

Cryptand-mediated transport; Temperature-jump method; Ionizable mobile carrier; Alkali cation transport kinetic (Castaing, M. (41) 203)

Liposome
Conformational change; Lipid head group; Zeta potential; Phase transition (Makino, K. (41) 175)

Low-angle laser light scattering
Carrageenans; Molecular weight determination; Gel permeation; Sedimentation–diffusion analysis; Osmometry (Slootmaekers, D. (41) 51)

M13 coat protein
Molecular dynamics simulations; Protein aggregation; α-Helix; β-Sheet (Sanders, J.C. (41) 193)

Mechanical balance
Polyelectrolyte brushes; Interendothelial cleft; Glycocalyx (Silberberg, A. (41) 9)

Membrane transport
Time delay (Ohshima, H. (41) 301)

Mg^{2+}-ATPase inhibition
N,N-dimethylformamide; Energy transfer inhibitor; Electron transport inhibitor; Photosystem II inhibition (Peña-Valdivia, C.B. (41) 169)

Micellar growth
Linear charged micelles; Polyelectrolytes (Odijk, T. (41) 23)

Microbial polysaccharides
Polysaccharide polyelectrolytes; Solution and gelling properties (Crescenzi, V. (41) 61)

Microporous membranes
Polyelectrolytes; Charge formation; Electro-osmotic effects; Poisson–Boltzmann equation (Hijnen, H.J.M. (41) 101)

Mixed valency counterion systems
Counterion condensation theory; Linear polyelectrolytes; Ion activity coefficients (Paoletti, S. (41) 73)

Molecular dynamics simulations
M13 coat protein; Protein aggregation; α-Helix; β-Sheet (Sanders, J.C. (41) 193)

Molecular weight determination
Carrageenans; Low-angle laser light scattering; Gel permeation; Sedimentation–diffusion analysis; Osmometry (Slootmaekers, D. (41) 51)

Muscle dynamics
Chemomechanical coupling; Biological engines (Oplatka, A. (41) 237)

^{23}Na
Intercalation; 9-Aminoacridine; DNA; ^{7}Li, NMR spin–lattice relaxation (Hald, M. (41) 113)

Neuro-computer
Lipid membrane; Phase transition; Oscillation; Excitability; Ca^{2+} binding (Toko, K. (41) 143)

NMR dispersion
Polyelectrolyte; Crosslink density; Ion mobility (Tromp, R.H. (41) 81)

***N,N*-dimethylformamide**
Energy transfer inhibitor; Electron transport inhibitor; Mg^{2+}-ATPase inhibition; Photosystem II inhibition (Peña-Valdivia, C.B. (41) 169)

Non-linear Markovian system
Brownian motion; Langevin equation; Gaussian white noise (Mazur, P. (41) 41)

Oscillation
Lipid membrane; Phase transition; Excitability; Ca^{2+} binding; Neuro-computer (Toko, K. (41) 143)

Osmometry
Carrageenans; Molecular weight determination; Low-angle laser light scattering; Gel permeation; Sedimentation–diffusion analysis (Slootmaekers, D. (41) 51)

Phase transition
Lipid membrane; Oscillation; Excitability; Ca^{2+} binding; Neuro-computer (Toko, K. (41) 143)

Conformational change; Lipid head group; Liposome; Zeta potential (Makino, K. (41) 175)

Photon-counting
Subtilisin; Fluorescence; Anisotropy; Lifetime (Janot, J.M. (41) 277)

Photosystem II inhibition
N,N-dimethylformamide; Energy transfer inhibitor; Electron transport inhibitor; Mg^{2+}-ATPase inhibition (Peña-Valdivia, C.B. (41) 169)

Poisson–Boltzmann equation
Polyelectrolytes; Charge formation; Electro-osmotic effects; Microporous membranes (Hijnen, H.J.M. (41) 101)

Poisson equation
Polyelectrolytes; Electroviscosity; Free volume model, Navier–Stokes–Onsager equation (Imai, N. (41) 31)

Polyelectrolyte brushes
Mechanical balance; Interendothelial cleft; Glycocalyx (Silberberg, A. (41) 9)

Polyelectrolytes
Viscosity; Light and neutron scattering; Halato-telechelic ionomers; Sulfonated polystyrene (Weill, G. (41) 1)

Charge structure function; Electrolytes; Dielectric structure function (Jannink, G. (41) 15)

Linear charged micelles; Micellar growth (Odijk, T. (41) 23)

Electroviscosity; Free volume model, Navier–Stokes–Onsager equation; Poisson equation (Imai, N. (41) 31)

Crosslink density; Ion mobility; NMR dispersion (Tromp, R.H. (41) 81)

Charge formation; Electro-osmotic effects; Microporous membranes; Poisson–Boltzmann equation (Hijnen, H.J.M. (41) 101)

Polysaccharide polyelectrolytes
Microbial polysaccharides; Solution and gelling properties (Crescenzi, V. (41) 61)

Protein adsorption
Two-dimensional aggregation; Computer simulation; Cellular automata; Ferritin (Stenberg, M. (41) 131)

Protein aggregation
M13 coat protein; Molecular dynamics simulations; α-Helix; β-Sheet (Sanders, J.C. (41) 193)

Proteins
Thermodynamics; Adsorption; Ion co-adsorption; Ion exchange; Silver iodide; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Proton pump
Bacteriorhodopsin; Purple membrane; Anesthetic–membrane interaction; Flash photolysis; *Halobacterium halobium* (Uruga, T. (41) 157)

Purple membrane
Bacteriorhodopsin; Anesthetic–membrane interaction; Flash photolysis; Proton pump; *Halobacterium halobium* (Uruga, T. (41) 157)

Sedimentation–diffusion analysis
Carrageenans; Molecular weight determination; Low-angle laser light scattering; Gel permeation; Osmometry (Slootmaekers, D. (41) 51)

β-Sheet
M13 coat protein; Molecular dynamics simulations; Protein aggregation; α-Helix (Sanders, J.C. (41) 193)

Silver iodide
Proteins; Thermodynamics; Adsorption; Ion co-adsorption; Ion exchange; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Solution and gelling properties
Polysaccharide polyelectrolytes; Microbial polysaccharides (Crescenzi, V. (41) 61)

Subtilisin
Fluorescence; Anisotropy; Lifetime; Photon-counting (Janot, J.M. (41) 277)

Subtilisin BPN′
Hydrogen exchange; Inhibitor binding; Viscosity coupling (Ng, K. (41) 289)

Sulfonated polystyrene
Polyelectrolytes; Viscosity; Light and neutron scattering; Halato-telechelic ionomers (Weill, G. (41) 1)

Supercoiled DNAs
Linear DNAs; Torsion constants; Ethidium dye (Wu, P.G. (41) 217)

Temperature-jump method
Cryptand-mediated transport; Ionizable mobile carrier; Alkali cation transport kinetic; Lipid membrane (Castaing, M. (41) 203)

Thermal denaturation
Equine lysozyme; Circular dichroism; Fluorescence (Morozova, L. (41) 185)

Thermodynamics
Proteins; Adsorption; Ion co-adsorption; Ion exchange; Silver iodide; Bovine serum albumin (Fraaije, J.G.E.M. (41) 263)

Time delay
Membrane transport (Ohshima, H. (41) 301)

Torsion constants
Supercoiled DNAs; Linear DNAs; Ethidium dye (Wu, P.G. (41) 217)

Tri- and tetra-anionic ligands
Bovine serum albumin; Ligand-binding kinetics; Isomerization modes; Electrostatic interaction (Murakami, K. (41) 253)

Two-dimensional aggregation
Protein adsorption; Computer simulation; Cellular automata; Ferritin (Stenberg, M. (41) 131)

Violaxanthin
Xanthophyll cycle; Zeaxanthin (Sielewiesiuk, J. (41) 125)

Viscosity
Polyelectrolytes; Light and neutron scattering; Halato-telechelic ionomers; Sulfonated polystyrene (Weill, G. (41) 1)

Viscosity coupling
Hydrogen exchange; Inhibitor binding; Subtilisin BPN′ (Ng, K. (41) 289)

Xanthophyll cycle
Violaxanthin; Zeaxanthin (Sielewiesiuk, J. (41) 125)

Zeaxanthin
Xanthophyll cycle; Violaxanthin (Sielewiesiuk, J. (41) 125)

Zeta potential
Conformational change; Lipid head group; Liposome; Phase transition (Makino, K. (41) 175)
